### 1) Remove Tail Light Screws

On the driver's side, remove the 4 screws that attach the tail light to the Jeep.

your tail light. Install two No. 10 screws and two spacers into the outside holes.

Tighten with a Phillips screwdriver. **DO NOT OVERTIGHTEN.**

### 2) Install Tail Light Cover

**NOTE:** The screws closest to the tailgate are size No. 8 and the screws to the outside of your tail light are No. 10.

Install two No. 8 screws and spacers into the holes **closest to the tailgate**. Ensure the spacers are between the tail light cover and

### 3) Repeat these steps on the passenger's side
