

FENDER FLARE

TG-FF6C4218

PLEASE READ AND FOLLOW THIS APPROVED INSTRUCTION CARE-FULLY BEFORE INSTALLATION. FAILURE TO DO SO MAY CAUSE DAMAGE TO THE VEHICLE AND WILL INVALIDATE THE WARRANTY.

PRIOR TO INSTALLATION

- Remove contents from box. Verify all parts are present and free from any defects or damage.
- Make sure installation is done on a non-abrasive surface to avoid scratching the flare surface.
- Pre-fit each flare to the vehicle body to ensure they suit the profile of the vehicle.
- Remove existing decals and mud flaps on the vehicle that may interfere with flare installation.
- Make sure all flares and fender wheel well are clean as the presence of dirt or sand may scratch auto body paint.
- Suggest removing the tire before installation for easier access.
- Do not use any harsh abrasive detergent to clean the flare.

PAINTING

Painted flares cannot be returned. Test fit before painting. We are not responsible for any costs that may incur if flares were painted without test fitting.

- Clean surface to be painted with a mild detergent or grease remover. Do not use lacquer thinner or any solvent based product.
- To achieve best result, wipe flare surface to be painted completely dry with a tack rag prior to paint.
- Use high quality polyurethane automotive paint to paint the flares. Application of primer may be needed. Please see paint manufacturer's specifications.
- Not recommend to paint the edge trim, but if desired, use a flex additive.

WARNING

Dirt or debris may become lodged between flares and vehicle's fenders causing scratching and paint wear from vehicle vibration. TYGER is not responsible for any damage, and installation is done with buyer's understanding that this damage may potentially occur.

SAFETY INFORMATION

- Before driving, ensure that flare is properly secured to vehicle.
- Do not use automatic "brush-style" car wash.
- Periodically check all components for tightness.

Hardware Included -

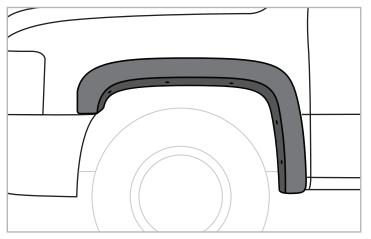

DAMAGED or MISSING PARTS?

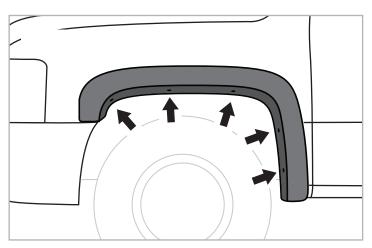

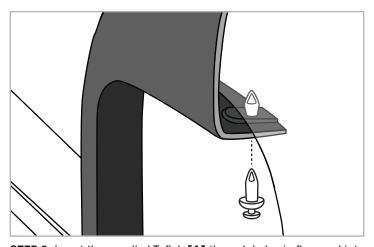

Driver Side Flare Installation

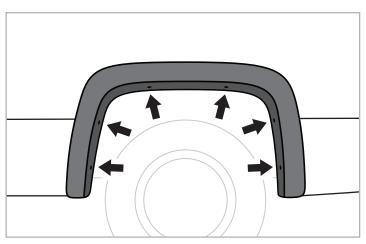

STEP 1: Position front flare in place by aligning up holes in flare with vehicle's existing factory holes.

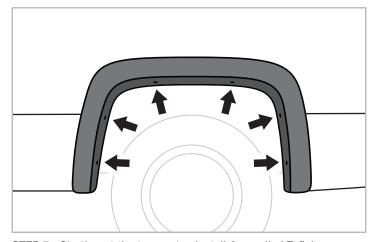

STEP 2: Starting at the top center, install 6 supplied Tufloks.

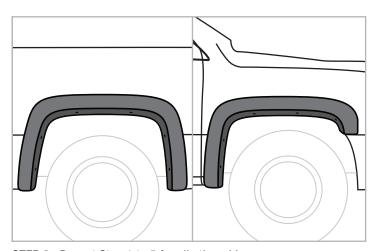

STEP 3: Insert the supplied Tuflok **[A]** through holes in flare and into vehicle's factory holes.

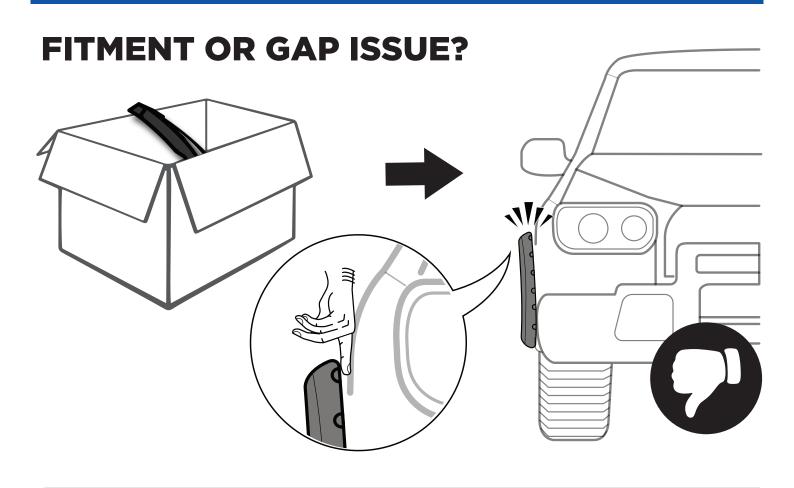

STEP 4: Position rear flare in place by aligning up holes in flare with vehicle's existing factory holes.

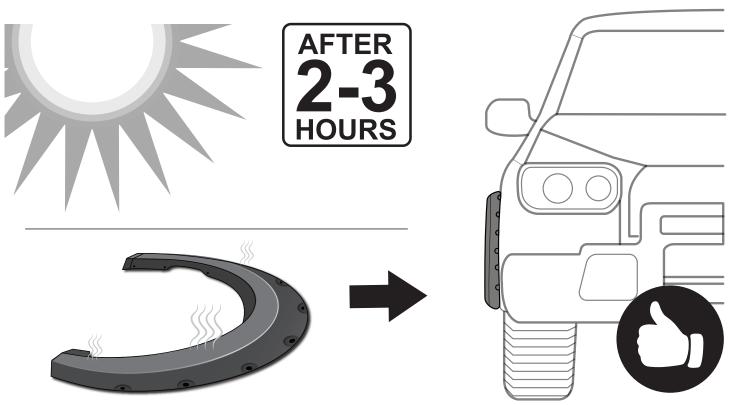

STEP 5: Starting at the top center, install 6 supplied Tufloks.

STEP 6: Repeat Step 1 to 5 for all other sides.

SOLUTION!

*In winter, heat gun or hair dryer may be used instead.
