## **Removal of stock system:**

1. Apply a penetrating lubricant liberally to all exhaust fasteners, hangers and rubber insulators.

2. Remove clamp just after the Y pipe. Refer to Figure 1.

3. Remove clamp from the rear of the muffler. **Refer to Figure 2**.

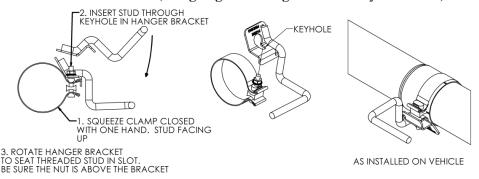

4. Remove the stock exhaust from the existing hangers and remove the system from the vehicle.

## Installation of MBRP Performance Exhaust:

1. Install **Front Pipe** over the existing Y using the **3**" **Clamp**. The **Front Pipe** will have to be cut depending model. **Refer to Chart 1.** Leave the **3**" **Clamp** loose enough for adjustment. **Refer to Figure 4**. Note the front pipe will not be required on a regular cab short box.

Cab Type	Box Length	Wheel Base	Front Pipe Required	Cut Required = New Length
Regular	6'4"	120.5	No	N/A
Regular	8'	140.5	Yes	Yes = 23"
Quad Cab	6'4"	140.5	Yes	Yes = 23"
Crew Cab	5'7"	140.5	Yes	Yes = 23"
Crew Cab	6'4"	149.5	Yes	No = 31"
		Chart 1		

2. Install the **Hang Tight<sup>TM</sup> Hangers** onto **3.0**" **Band Clamps** using the procedure shown below. (Hang Tight<sup>TM</sup> Hanger not exactly as shown)

3. Slide the **Front Hang Tight<sup>TM</sup> Hanger Clamp Assembly** over the **Front Pipe.** Attach the hanger to the existing rubber insulator. Install the **Extension Pipe** to the **Front pipe** using a **3**" **Clamp. Refer to Figure 4**.

Figure 5

Figure 6

Figure 8

Figure 9

3. Install the **Rear Hang Tight<sup>TM</sup> Hanger Clamp Assembly**. **Refer to Figure 5**. Install the **Muffler** to the **Extension Pipe** using the **Hang Tight<sup>TM</sup> Hanger Clamp Assembly**.

4. Slide two 2 <sup>1</sup>/<sub>2</sub>" Clamps over the outlets of the Muffler. Position the Driver Side Over Axle Pipe over the axle and loosely attach it to the Muffler. Install the Driver Side Over Axle Pipe hanger into the factory rubber insulator. Repeat these steps for the Passenger Side Over Axle Pipe. Refer to Figure 6 & 7.

5. Slide a 2 <sup>1</sup>/<sub>2</sub>" **Band Clamp** over the **Driver Side Over Axle Pipe** and install the **Driver Side Tail Pipe**. Insert the **Driver Side Tail Pipe** hanger into the **Rubber Insulator** provided. **Refer to Figure 8**.

6. Slide a 2 <sup>1</sup>/<sub>2</sub>" **Band Clamp** over the **Passenger Side Over Axle Pipe** and then install the **Passenger Side Tail Pipe**. Insert the **Passenger Side Tail Pipe** hanger into the existing rubber insulator.

6. Install and adjust the **Exhaust Tips** to suit. Using a 17mm wrench tighten the lock bolt located on the **Exhaust Tips**. **Refer to Figure 9**.

7. Tighten all hardware and clamps, starting at the front and working rearward to secure the system. Check along the full length of the exhaust system to ensure there is adequate clearance for fuel lines, vent lines, brake lines, frame, bodywork, suspension, and any wiring, etc. If there is any interference detected, relocate, or adjust to provide adequate clearance. Ensure all clamp connections are secure and components are unable to rotate or slide. Band clamps require approximately 45 lb-ft (60 N-m) of torque. Verify clearances, system security and band clamp torque after 30-60 miles (50-100 km) of driving.

**Congratulations!** You are ready to begin experiencing the improved power, sound and driving experience of your **MBRP** performance exhaust system. We know you will enjoy your purchase.
