**ABOUT PAINTING:** Painted flares cannot be returned. Test fit before painting. We are not responsible for any costs that may incur if flares were painted without test fitting.

- Clean surface to be painted with a good grade degreaser. Do not use lacquer thinner or any solvent based product.
- Wipe flare surface completely dry with a tack rag prior to paint.
- Application of plastic adhesion promoter for PP plastic as per your paint system manufacturer's recommendations is required.
- Use a high quality enamel or polyurethane automotive paint to paint the flares.
- Not recommend to paint the edge trim, but if desired use a flex additive.

**1**

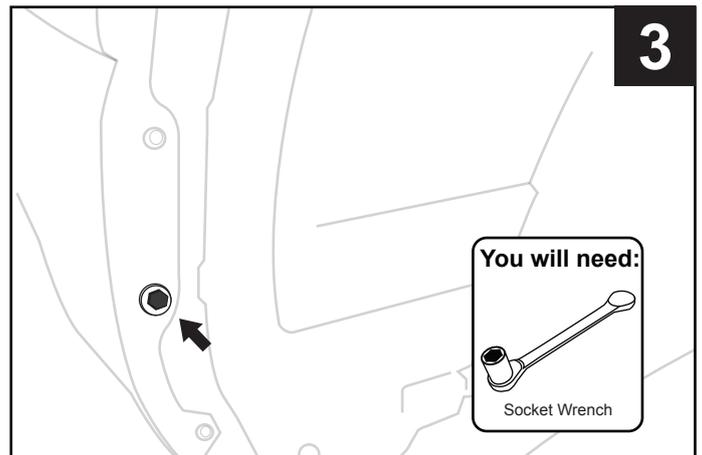

1. Start at factory FRONT wheel well mud flap on PASSENGER side.

**2****You will need:**

Socket Wrench

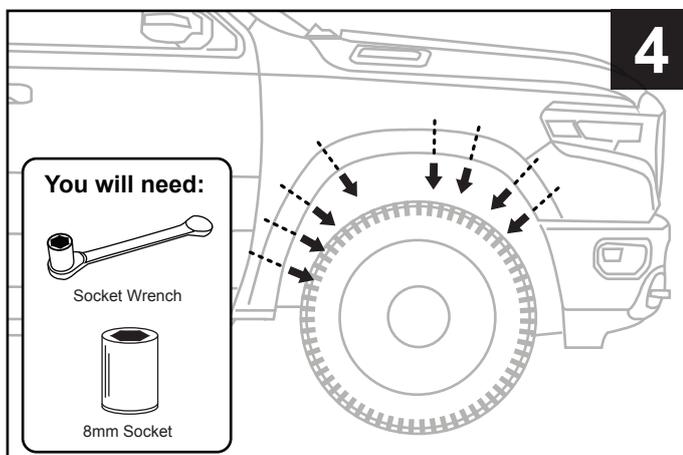

Plastic Fastener Remover Tool

**3****You will need:**

Socket Wrench

3. Re-apply 1 removed factory screw from STEP 2 back to the lower hole (arrow). Hold onto remaining 1 factory screw.

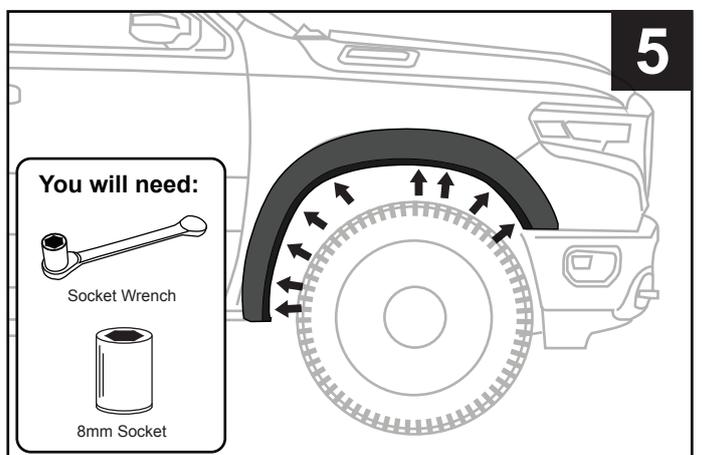

**4****You will need:**

Socket Wrench

8mm Socket

4. Remove and hold onto 8 factory screw from inside of wheel well. You should now have 9 total factory screws for flare installation.

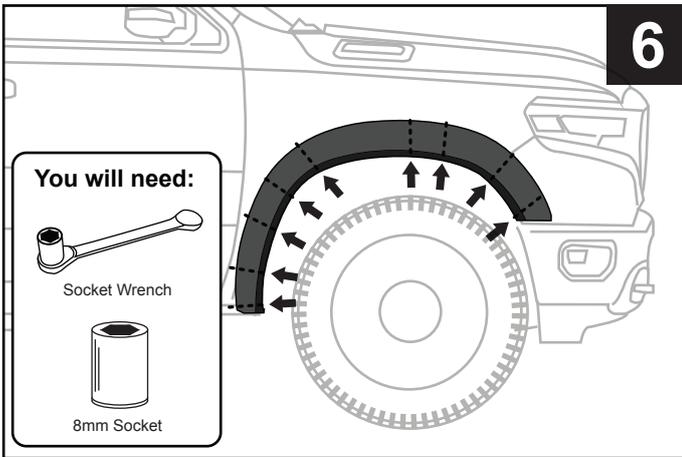

**5****You will need:**

Socket Wrench

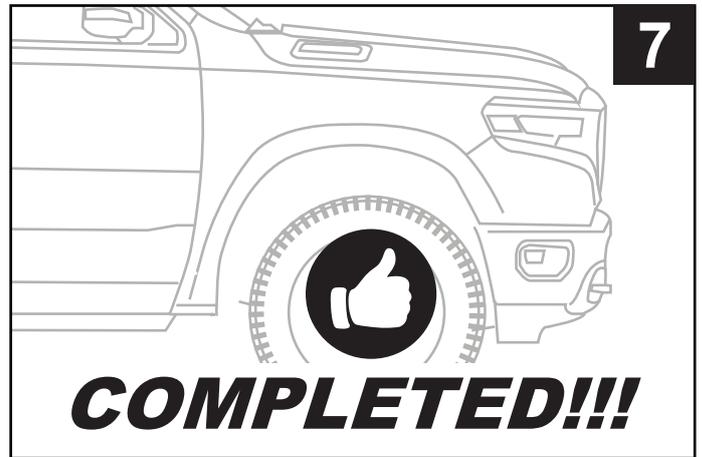

8mm Socket

5. Secure flare against vehicle and apply 9 factory screws from STEPS 3-4 without tightening.

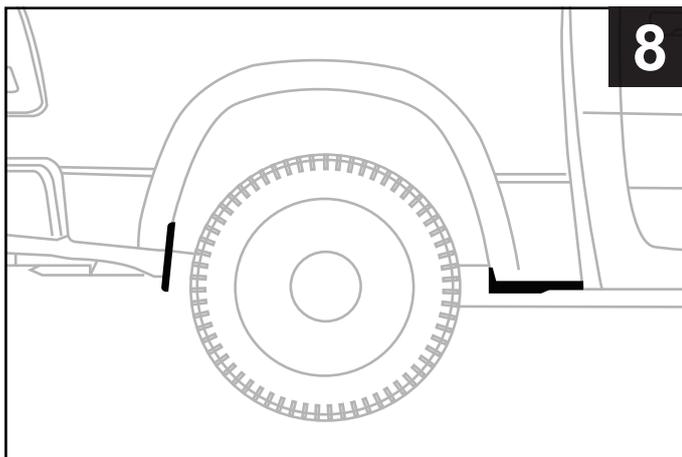

6. Tightly press flare against vehicle to evenly remove space between flare and vehicle. Tighten all 9 screws.

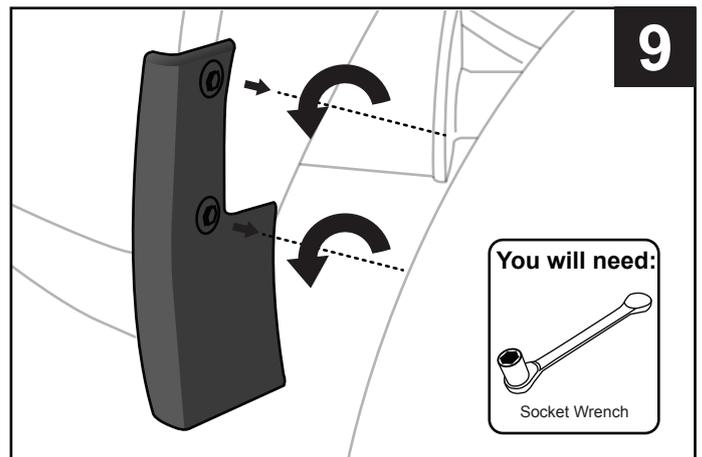

7. Front flare completed. Now onto rear flare installation.

## REAR FLARES INSTALLATION

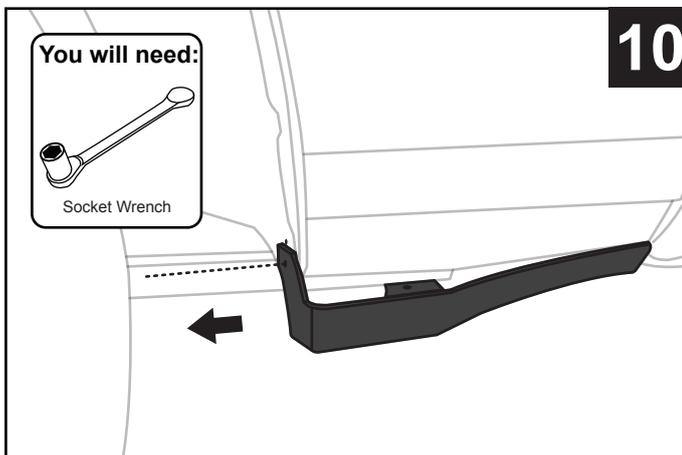

**NOTE:** Trucks without fender liners, the top 3 holes on the rear wheel well are empty

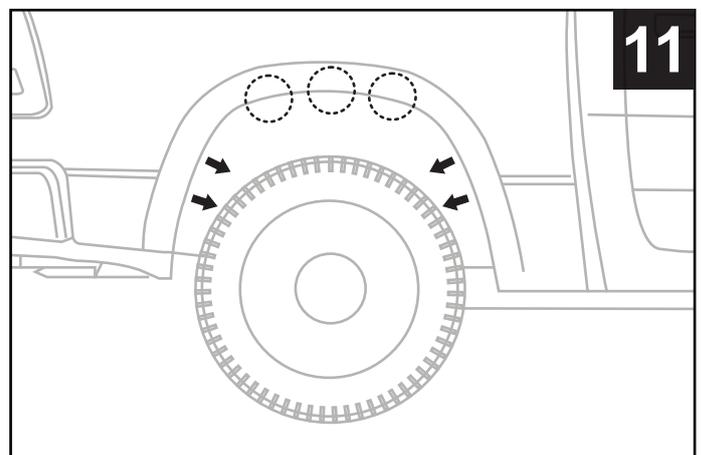

8. Start at 2 factory REAR wheel well mud flaps (vertical and horizontal) on PASSENGER side.

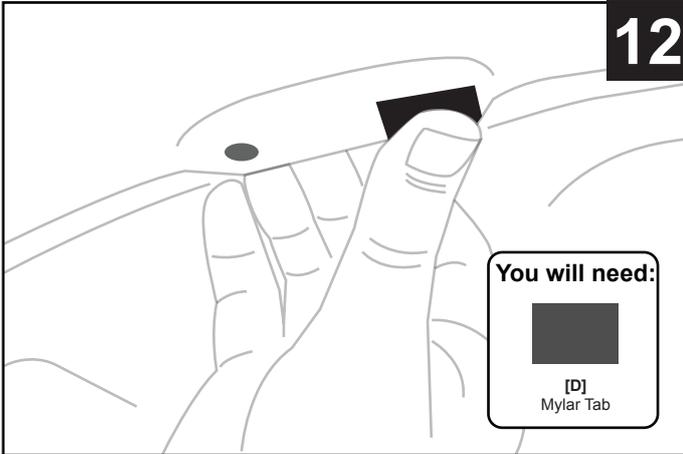

9. Remove 2 factory screws from vertical mud flap. Then uninstall the flap. Hold onto screws.

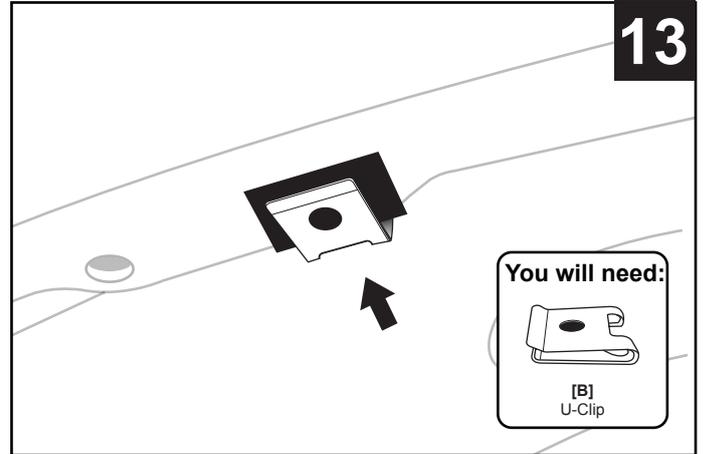

10. Remove 1 factory screw from horizontal mud flap. Then uninstall the flap. Hold onto screw (3 total).

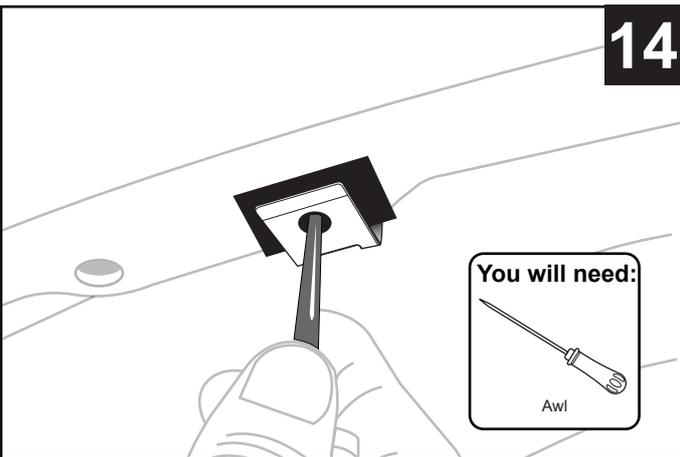

11. Remove 4 factory screws from inside of wheel well. Hold onto screws. You should have 7 factory screws for flare installation. Circles indicate factory hole locations for STEP 12.

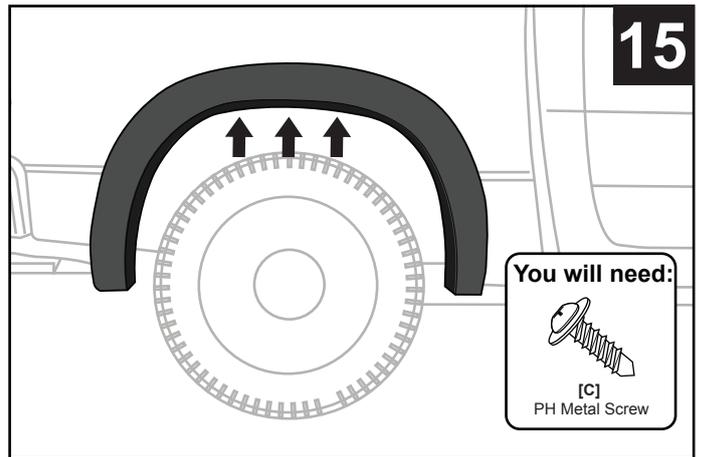

12. Apply supplied Mylar Tab [D] over each of the 3 top factory holes indicated in Step 11.

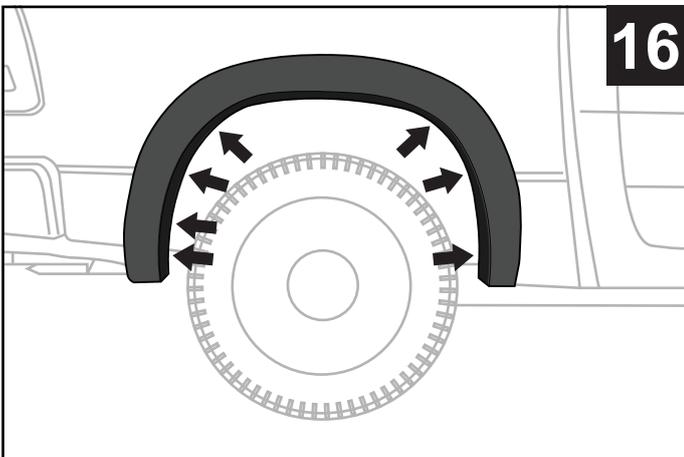

13. Install supplied U-Clip [B] by lining up clip hole with factory hole covered by Mylar Tab.

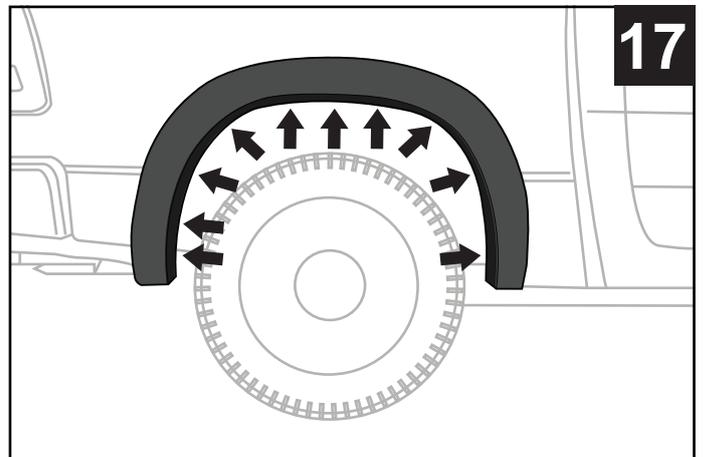

14. Poke a hole through U-Clip and Mylar Tab in a straight line using an awl or other pointed tools. Repeat STEPS 12-14 for remaining 2 factory hole locations indicated in STEP 11.

15. Secure flare against vehicle and apply 3 supplied PH Metal Screws [C] using a Phillips screwdriver without tightening.

16. Still securing flare, apply 7 factory screws (from STEPS 9-11) to their original factory holes without tightening.

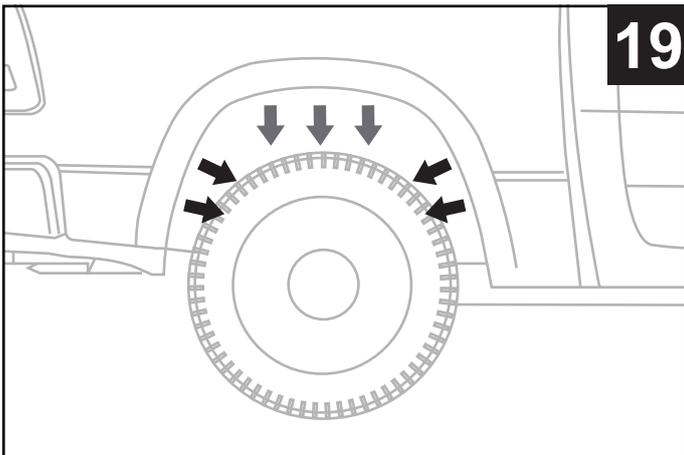

17. Tightly press flare against vehicle to evenly remove space between flare and vehicle. Tighten all 10 screws.

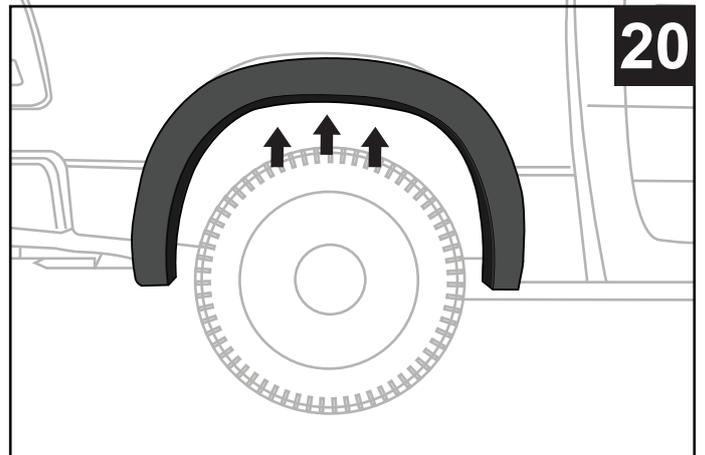

18. Rear flare without fender liners completed.

## TRUCKS EQUIPPED WITH FENDER LINERS

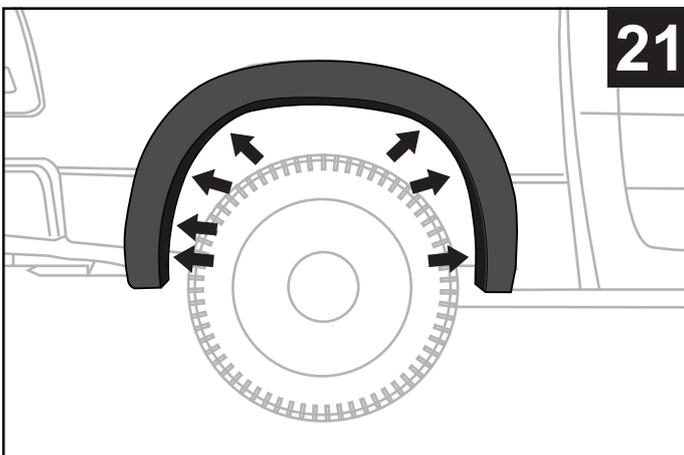

**NOTE:** Trucks equipped with fender liners will have 3 factory screws at the top of the fender.

19. Repeat **STEPS 8-10** (hold onto **3** screws). Then remove **7** factory screws from positions inside of wheel well shown in the diagram. Hold onto those screws. You should have **10** total factory screws for flare installation.

20. Secure flare against vehicle and apply **3** factory screws from **STEP 19** without tightening.

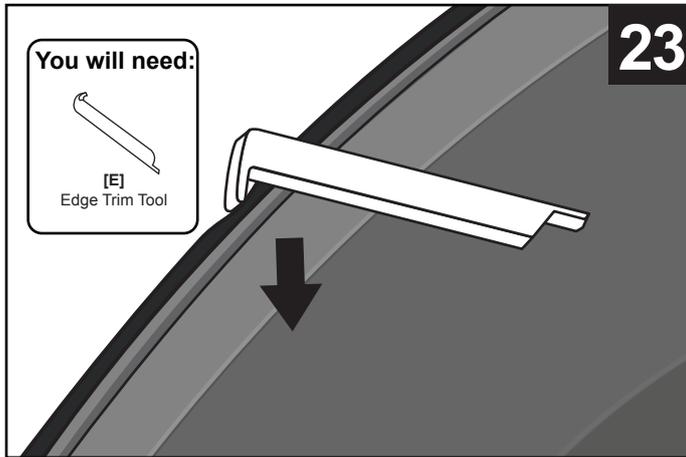

21. Still securing flare, apply remaining **7** factory screws to their original factory holes without tightening.

22. Tightly press flare against vehicle to evenly remove space between flare and vehicle. Tighten all **10** screws. Installation complete.

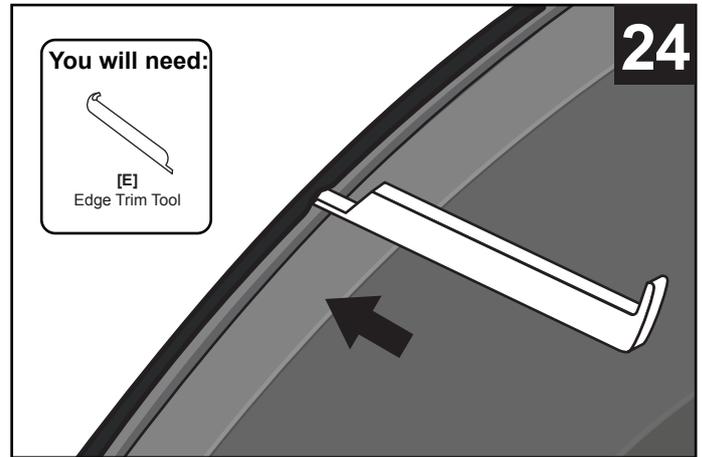

## EDGE TRIM TOOL USAGE (OPTIONAL):

23

23. If needed, use supplied **Edge Trim Tool [E]** to trim outer edge by inserting the curved end, then sliding around the entire trim from one end to the other.

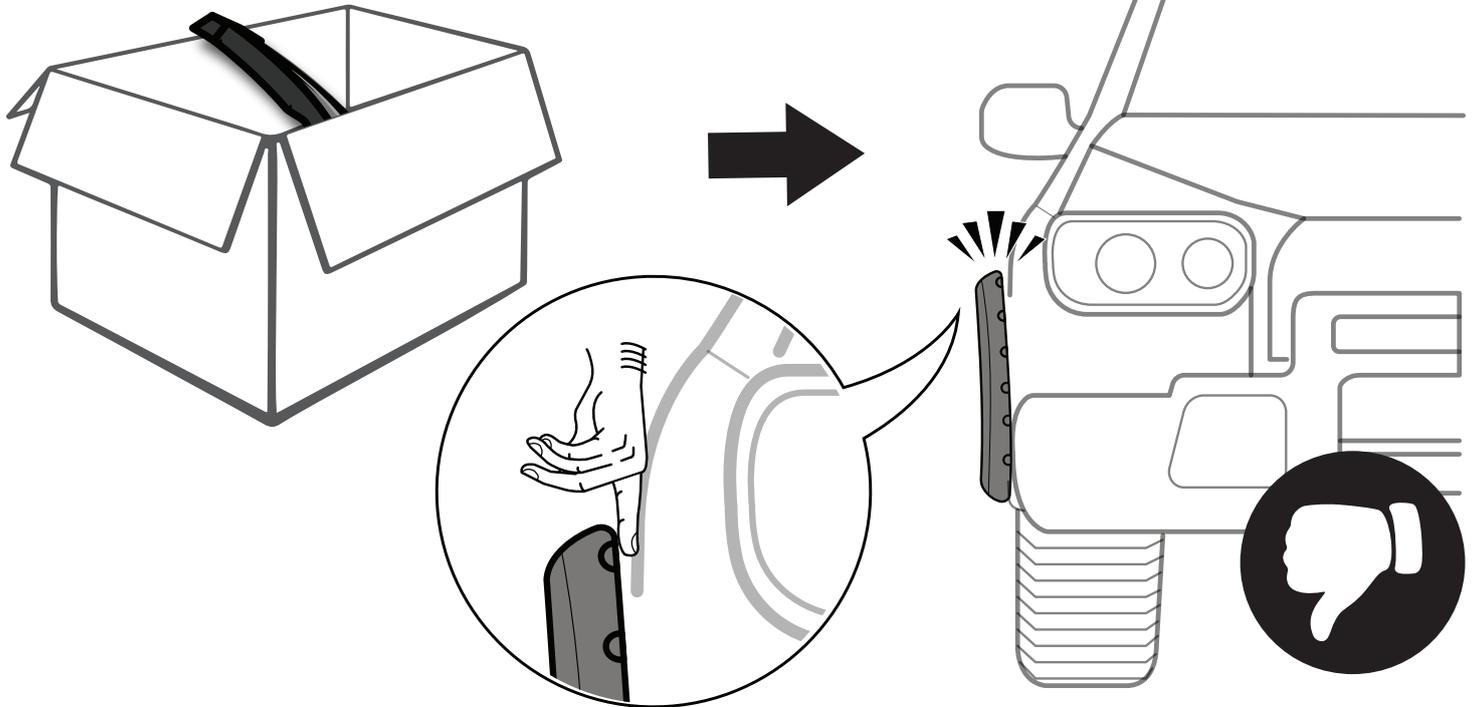

24

24. If needed, use supplied **Edge Trim Tool [E]** to trim inner edge by inserting the straight end, then sliding around the entire trim from one end to the other.
